

RhinoClean™

PRODUCT DATA SHEET

ER8500™ Emulsion Removing Powder

Description

- Emulsion Reclaiming Concentrate designed for quick and convenient removal.
- Removes emulsions and capillary films from screens.
- Easy to dissolve contents into water to make reclaiming solutions.
- No separation of active ingredients.

Directions

1. Dissolve contents of ER8500™ into water to make reclaiming solutions. Mix .5 oz. of powder per gallon with water.
2. Brush solution of ER8500™ onto both sides of stencil until stencil emulsion dissolves.
3. Rinse off with high pressure cleaner.

It is the responsibility of the screen printer to test the product; review the MSDS prior to use to evaluate whether or not the product is correct for the application intended.
