

RhinoClean™

PRODUCT DATA SHEET

SW145C™ Screen Wash Degradent

Description

- A Citrus-scented, water-soluble screen wash designed to work quickly on Plastisol and UV Inks.
- Ideal for efficient and expedient screen washing after the press run.
- Has a higher flash point than lacquer thinner, alcohols, ketones, etc.
- Biodegradable, non-toxic and environmentally friendly.

Directions

1. To remove ink from screen images, apply SW145C™ to squeegee-side of screen and wipe clean.
2. To clean screen following production run 1) scrape off remaining ink; 2) apply SW145C™ to both sides of screen with a brush and wipe clean with towel or rinse with water.

It is the responsibility of the screen printer to test the product; review the MSDS prior to use to evaluate whether or not the product is correct for the application intended.
